SUMMARY

I am a Full Stack Developer with proficiency in React, Node.js, and JavaScript, along with modern frontend frameworks. I have strong expertise in building RESTful APIs, database management, and cloud deployment. I am adept at creating impactful web applications and continuously strive to improve my skills and knowledge in software development.

PROJECTS

job-portal

The project is built using ReactJS (frontend) and Node.js with Express.js (backend), ensuring a fast and scalable experience. Authentication and security are managed using JWT (JSON Web Tokens), and MongoDB is used as the database for storing job listings, user profiles, and applications..
